

## **THE THESIS SUMMARY INFORMATION ON THE NEW CONTRIBUTIONS**

Name of thesis: **The quality management of undergraduate training programs according to AUN-QA standards**

Major: Educational Management

Major code: 9140114

Full name of PhD student: VO Le Hoang Quyen

Full name of Supervisor 1: Professor. NGUYEN Duc Chinh

Full name of Supervisor 2: Assoc.Prof. TRAN Xuan Bach

### **The new contributions**

First, based on the theoretical basis of the study of the quality management of training programs at universities and the domestic quality assurance legal corridors, the thesis has generalized and clarified the issues of basic theoretical topics on the quality management of training programs according to the method of quality assurance standard.

Second, the thesis propose The quality management system (internal quality assurance system) of undergraduate training programs according to AUN-QA standards to assess the undergraduate training programs as well as steps to establish and operate this system with definition of: Quality Management of Educational Programs based on a set of quality assurance standards and The procedure of using the standards in quality management of training programs.

Third, this thesis conduct surveys, analyze and assess the current state of the undergraduate training programs, the quality management of undergraduate training programs and factors affecting the quality management of AUN-QA quality assurance standards to evaluate the level of 03 Vietnamese educational institutions: Ha Noi University of Science and Technology, The University of Da Nang, University of Science and Technology and Quy Nhon University.

Fourth, this research propose principles for the production system, measures to develop the quality management system and the connection among measures to improve the efficiency, sustainability, transparency and publicity in quality assurance of undergraduate training programs; consult the urgency and feasibility of the proposed measures and implement one of the proposed measures.

Fifth, the research results establish and operate the quality management system (internal quality assurance system) training program with AUN- QA standards to assess the quality of training program and implementation measures that can be applied in universities with some adjustments.
